

Wednesday 17th June

Good Morning Class 5!

Well done to those of you have done your project work for this week and completed the quiz on Google Forms – this is the first time I have used this. A few of you are asking if you get to see your scores. I will post the correct answers later in the week so you can check and research how to setup a quiz which gives you a score at the end.

I was very pleased to take to the school office yesterday **FIVE SILVER STAR BADGES** and postcards which will be posted out this week to members of our class who have really impressed me so far during School@Home. I am also on the lookout for my latest learners of the week, so keep working hard! Don't forget it's also the **Virtual Bake-Off on Friday** so get your flour in!

Every Day Counts

Today it is the 17th of June, so it's number 17! An odd number, does that mean it is also prime?

Maths No Problem – Chapter 12 Lesson 11

Your focus today switches to estimating the area in kilometres. Remember to always be looking for the scale of any diagrams which are shown.

English

Please do **pages 7-9** of your Talk4Writing booklet today, in which you are introduced to the model text and you make some predictions.

Reading

The next chapter of '*Evie & the Animals*' is ready! Still need that haircut ☺

Art

Mrs Clapcott has created another superb art tutorial based on Leonid Aframov, if you are feeling creative and up for a challenge, see if you can create your own masterpiece!

Remember to make sure your **project work on the Amalfi Coast** is done because next week we will move on to the next world coastline!

Have a great day!

Mr Croutear
